A work in progress, all feedback is most welcome.

Taking Care of your Lawns

Now is a great time to weed and feed your lawn. As well as killing the weeds, it reduces brown patches and helps maintain a good colour for the coming months. (See our special offer)

What I can do for you

Moss can also be a problem at this time of year so if the moss hasn't gone away, it's time to apply moss killer.

The Weeds are flourishing, so to take control before they get to be a real nuisance. Why not get your paths driveways and edges sprayed before the weeds take over.

Thanks Ian!

A huge thank you to Ian who took the before and after pictures of his garden for me.

Before 'n' After

Advice Corner #2

Over time a lawn can become compacted, especially in and around gateways and areas of heavy use. Using a garden fork or a special spiking tool relieves compaction and helps surface water to drain away. It also allows more air to reach the roots of the grass which aids healthy growth. Make sure the holes quite deep – the deeper the better. On heavy soils a sandy top dressing should be brushed into the holes.

Special Offer

Offer price: \$10 (plus regular cost of lawn) **for Weed and Feed**
